

## THE SCIENCE

Dr. Marcus Kuypers, Dr. Joe Guarnera, Dr. Gary Booth, Dr. Natale Vitori, and Dr. Ahmed shared their professional opinions on the eXfuze brand of products and all concluded that:

"The eXfuze brand of products provide the **raw materials to help the body heal itself\***."

Each of the doctors acknowledged the damaging effects of inflammation on all of the body's systems. Thankfully, eXfuze has products that can help the body protect, heal, regulate, and maintain itself\*.

This was demonstrated through several **scientific studies** that have been completed in reputable university laboratories such as the ***University of Miami, Brigham Young University, and Purdue University.***

**Dr. Gary Booth of Brigham Young University** conducted independent studies that show empirical data as to the effectiveness of the eXfuze brand of products on human cells. Dr. Booth's studies **showed that 80%+ of abnormal cells died when Seven+ was introduced!** As Dr. Booth said, "**WOW!**" **Dr. Booth also stated that the studies show that Seven+ is very bioactive on free radicals and is loaded with anti-oxidant activity!**

Dr. Natale Vitori, world-renowned scientist, explained the incredible science of Fucoidan and **Brown Seaweed extract**. Since pre-historic times, Fucoidan has created mechanisms to protect itself. It is a complete polysaccharide with tremendous **anti-viral\***, **anti-inflammatory\***, **anti-flu\***, **tissue regenerative\*** and **neuron protecting properties\***.

**Purdue University tested the purity of Fucoidan in the eXfuze brand of products** by conducting a molecular weight analysis, chromatographs, composition analysis and other tests. **Present in every bottle of eXfuze products are four critical complex sugars that are ONLY available from ingesting algae! These complex sugars are critical to your brain health.**

In summary, the eXfuze brand of products provides your body with the raw materials to **defend\***, **repair\***, **regenerate\***, **regulate\***, and **maintain itself** in all body systems and we now have the science to prove it!
